USB Drive, Thumb Drive, U Drive, Pen Drive, whatever you call the drive, it is becoming the standard for moving digital files. Fidelity recognized this fact and offers the USB Drive compatible digital On-Hold System.

Moving message files to the MessageStar60 is quick and simple for the customer. Insert the USB Drive into the USB port of your PC or Mac and the computer will recognize it as a removable drive. Drag and drop the message file, or files, into the USB Drive. Remove the USB Drive from the computer and insert it into the MessageStar60. This system does not require external computer hardware and is perfect for e-mailing messages to the store for insertion.

Setup for the MessageStar60 is easy. Insert the USB Drive and the MessageStar60 plays the file or multiple files automatically with the factory presets. You can use the Front Panel Digital Controls to adjust the volume, contour the sound with the two band equalizer and step through the loaded files to select an individual message to play. System settings and levels will be displayed on the MessageStar60’s LCD panel as you adjust them. When finished customizing the system, the LCD displays the current message playing.

Mounting the MessageStar60 is easy with the included wall mounting bracket. Attach the bracket to the wall, plug in the cables and slide the system into place. This unique mounting bracket gives the system the smallest footprint possible. The MessageStar60 requires a mounting space of only 2 3/4" X 6 1/2".
